

**COLD DISPENSED BEVERAGE
EQUIPMENT**

MORE VARIETY

BUNN cold beverage dispensers create drinks from a variety of concentrate platforms, including frozen caddies, ambient caddies and bag-in-a-box containers, with the capacity to serve multiple platforms in the same machine. You have the flexibility and control to serve a variety of beverages in a way that reliably meets the requirements of the serving location and ensures profitability.

HIGH INTENSITY® MIXING

Because viscosity or thickness of concentrate can vary widely, BUNN has developed the High Intensity mixing chamber to assure best results in every cup with great-tasting, authentic juice flavor.

The concentrate is injected along with water under high pressure into the mixing chamber and is then thoroughly blended to create a quality-finished beverage. High-viscosity concentrate at ratios of 4-to-1 and 5-to-1 (water-to-concentrate) can be mixed accurately and consistently. This assures a high-quality, delicious beverage of ideal consistency from the top to the bottom of every glass.

Juice – JDF-4S

Cold beverage dispenser with High Intensity® mixing delivers superior drinks consistently

New segmented LED lighted door features four different display slots and eight different graphics allowing for easy adaptability to beverage menu

One dispenser delivers both frozen and ambient products increasing profits by lowering costs

18lb (8.2kg) ice bank provides superior cold drink capacity
